Archi

Archi collection is a collaboration between Wintex and Claudio Bellini Design Studio.

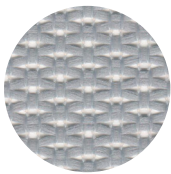

This collection composed of textiles and mesh for the contract market is sophisticated and playful, and is produced according to the standards associated with Wintex. The core textile designs are suitable for use in a wide variety of interiors, and work beautifully together in a multitude of different combinations.

Archi is worked into a combination of diverse yet complementary tones and weaves. Teamed to suit and convey an instant visual appeal. With vibrant primary colors as its core, the classic and strong approach overall makes it a collection that is minimal but essential.
